

Abutilon Hybridum

MAPLE PLANT

Bloom Color: Orange, Purple, Red, Salmon, White, Yellow. Main Bloom Time: Early summer, Early fall, Early spring, Early winter, Late summer, Late fall, Late spring, Late winter, Mid summer, Mid fall, Mid spring, Mid winter. Form: Spreading or horizontal, Upright or erect.

Physical Characteristics

Abutilon x hybridum is an evergreen Shrub growing to 3 m (9ft) by 3 m (9ft) at a fast rate.

It is hardy to UK zone 8. It is in leaf all year, in flower from May to June. The species is hermaphrodite (has both male and female organs).

Suitable for: light (sandy), medium (loamy) and heavy (clay) soils. Suitable pH:

mildly acid, neutral and basic (mildly alkaline) soils. It can grow in semi-shade (light woodland) or no shade. It prefers moist soil.

Edible Uses

Edible Parts: Flowers

Flowers - raw or cooked. A delicious sweet flavour, they are excellent on their own or as part of a mixed salad. The flowers produce nectar all the time they are open so, assuming the plant is grown indoors and is not visited by pollinating insects, the sweetness increases the longer the flower is open.

Medicinal Uses

Plants For A Future can not take any responsibility for any adverse effects from the use of plants. Always seek advice from a professional before using a plant medicinally.
